

。 GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Computer aided design (CAD), PG_00055891							
Field of study	Power Engineering, Power Engineering, Power Engineering							
Date of commencement of studies	October 2022		Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	2		Language of instruction			Polish		
Semester of study	4		ECTS credits			3.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Institute Of Mechanics And Machine Design -> Faculty Of Mechanical Engineering And Ship Technology -> Wydziały Politechniki Gdańskiej							
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Michał Wodtke					
	Teachers		dr inż. Katarzyna Mazur					
			mgr inż. Kornel Piłat					
			dr hab. inż. Michał Wodtke					
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
of instruction	Number of study	15.0	0.0	0.0	30.0		0.0	45
	E-learning hours inclu							
Learning activity and number of study hours	Learning activity	Participation in classes includ plan	n didactic ed in study	Participation in consultation hours		Self-study		SUM
	Number of study hours	45	3.0			27.0		75
Subject objectives	Aquisition of knowledge and design skills with the use of CAD (Computer-Aided Design) systems.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_U08] can design the basic parameters of the selected technology related to energy conversion and select auxiliary devices and evaluate the project in terms of technical and economic		Student uses CAD tools that use engineering algorithms of various advancement levels. Student uses program libraries and external databases.			[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools		
	[K6_U04] is able to design a simple device structure and prepare the accompanying technical documentation, conduct a basic technical and economic analysis of energy systems, including technologies using renewable and pro-ecological energy sources as well as conventional and nuclear energy, design energy installations for them and their basic elements (including electric lighting)); select, operate and control the most commonly used electrical devices and drive systems. [K6_K02] is able to work in a		Student uses CAD tools that enable 3D design, creating 3D dosumentation, creating assembly and manufacturing 2D drawings.			[SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment		
	group taking different roles in it, can think and act in an entrepreneurial way, is aware of responsibility for their own work and responsibility for teamwork		an assigned task, taking into account cooperation in a project group, he/she is able to cooperate with other members of the group while solving the given problem.			skills [SK3] Assessment of ability to organize work		

Subject contents	Familiarization with CAD 3D software (Inventor or Solidworks or others) in the field of creating 2D and 3D technical documentation, dimensional analysis, familiarization with available databases of machine elements (both from the program library and from external sources, e.g. database of suppliers of machine components).					
Prerequisites and co-requisites	Engineering graphics, Strength of Materials, basic of using CAD systems					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	Task I	60.0%	20.0%			
	Task III	60.0%	60.0%			
	Task II	60.0%	20.0%			
Recommended reading	Basic literature	Tutorials (help systems) for 3D CAD software Dobrzański T.: Rysunek Techniczny Maszynowy, WNT Warszawa 2005				
	Supplementary literature	Any literature for CAD software, e.g Jaksulski A. :Autodesk Inventor 2020 wyd. Helion.				
	eResources addresses	Adresy na platformie eNauczanie:				
Example issues/ example questions/ tasks being completed	Design a system that converts rotary motion to reciprocating motion for specific assumptions using the CADprogram. Perform a kinematic simulation of the proposed solution. Design, using the CAD program, the schematic functional layout by selecting elements from the program library and external databases.					
Work placement	Not applicable					

Document generated electronically. Does not require a seal or signature.
